AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

[0107] With reference now to Figure 12b, the alarm system 66 is shown mounted to the ECU 28. As illustrated, the alarm system 66 advantageously is a stand-alone unit that allows the alarm system 66 to be a conveniently installed option in factory prepared motorcycles. The alarm system 66 includes the power circuit 7278, the alarm device 62 and the vibration detection circuit 7872. In some arrangements, the capacitor circuit 74 can be included within the alarm system 66 as well.
